

Who is

MASTER PNEUMATIC

Master Pneumatic (MP): A Leading FRL
Manufacturer in Metro Detroit.

ABOUT US

Situated in the Metro Detroit area, Master Pneumatic (MP) has grown from its inception in 1950 to emerge as a premier player and global powerhouse in the field of FRL manufacturing.

With a presence spanning over 35 countries, we proudly offer a diverse range of more than 700 custom products meticulously tailored to suit our customers' specific applications. Drawing upon decades of design and manufacturing expertise, we bring forth an unparalleled level of flexibility and innovation that sets us apart in the industry.

Through seamless vertical integration, we have solidified our position as a prominent producer of FRL systems and an array of pneumatic devices. Backed by our exceptional 7-year warranty and adherence to ISO 9001:2015 standards, our offerings provide customers with unwavering reliability and the assurance to enhance and safeguard their systems with utmost confidence.

SPECIALIZATION

FRL Assemblies:

Versatile Filtration, Pressure Regulation, and Lubrication Solutions.

Discover our comprehensive range of FRL assemblies designed to cater to a wide array of filtration, pressure regulation, and lubrication needs. Renowned for their unmatched reliability and cost-effectiveness, our FRL assemblies stand out as top-notch choices in today's market.

Precision Lubrication:

Advanced SPL & MPL Lubricators

Experience the epitome of precision lubrication with our Single-Point and Multi-Point Lubricators (SPL & MPL). These cutting-edge solutions guarantee optimal performance, prolonged tool life, reduced maintenance, and enhanced tool control. Unlike traditional mist lubricators, our precision lubrication technology safeguards your equipment against unnecessary damages, while maximizing its potential to the fullest.

"Big Air" Regulators

Unleash Your System's Performance

Introducing our revolutionary "Big Air" regulators that boast unparalleled high flow, high relief performance, and the ultimate air output. With externally piloted regulators available in sizes of up to 3" ports and flow ratings surpassing 4000 SCFM, these high-flow regulators offer a cost-efficient solution and ensure a remarkable return on investment. Unleash your system's true capabilities without compromising its integrity.
